

VIKRE DISTILLERY

LAKE SUPERIOR VODKA

Like shades of white, flavors in vodka are all about subtlety. While most vodka is made from a single grain (usually either corn or wheat), we use a combination of local barley, corn, and wheat so that the qualities of each grain can balance the others out. This makes for a spirit that is warm yet crisp, smooth yet rich, with the gentlest notes of vanilla, honey, and cereal.

and fresh.”*

OUR STORY

Vikre Distillery began with a calling... Inspired by the vastness of Lake Superior and the quiet beauty of the Northwoods, Emily and Joel Vikre decided to leave their jobs on the East Coast to move to Duluth, MN and start a craft distillery. We cannot imagine a more perfect place than Northern Minnesota for distilling fine spirits. Many of the world's best ingredients are right here at our fingertips: local grains, foraged botanicals, Minnesota white oak barrels, and the crystalline water of Lake Superior.

All of our spirits are inspired by the terroir of this place, its nature and its culture. Everything is made by hand, in our distillery, overlooking a bay on one side (Vikre actually means "people of the bay" in Norwegian) and the sea-like expanse of Lake Superior on the other.

When you live in Duluth, everything is oriented around the Lake. She is the largest body of fresh water in the world: as large as all the other Great Lakes combined, plus three extra Lake Eries for good measure; 10 percent of the world's fresh water; enough water to cover all of North and South America in a foot of water. The Lake makes mystics of us all. Crafted from local wheat, corn, barley, and showcasing Lake Superior's pristine water, our Lake Superior Vodka is our truest celebration of the greatest of the Great Lakes.
